

Below is some information on each of the sites monitored by the Grand Council Treaty #3 Territorial Planning Unit as well as a link to the location on Google Maps.

Laurensens Creek – Site chosen because the creek flows through city of Kenora and has many residential and commercial buildings built along it, has one of Kenora's main boat launches on it, and flows in Lake of the Woods by downtown Kenora. <https://goo.gl/maps/jHnL1Bx2jB6hprYM6>

Harbor Front – Site chosen as it is one the most popular boat docking locations in Kenora, located by the downtown waterfront and directly before the start of the Winnipeg River. Gives insight into water quality before potential impacts occur while water flows through the Winnipeg River. <https://goo.gl/maps/apxZFWex1ec2Z6T48>

Keewatin Arena – Site chosen because Keewatin is another popular boat launch and docking location in Kenora. Many residential and commercial building located along Keewatin waterfront. <https://goo.gl/maps/cKVw6A59Lod3PHUo6>

Ash Rapids Lodge – Single set of samples collected here during a youth camp. Not a true reference location as it's from a tourist camp dock but is far away from municipal areas. <https://goo.gl/maps/6ZXRYo6fMxh5JJcn6>

Dryden Government Dock – Chosen because it's the dock is on the last section of Wabigoon Lake before water enters the Wabigoon River. Gives insight into water quality of the lake before potential impacts along river. <https://goo.gl/maps/b9hnqaT68GRhNdk66>

Dryden Mill – Site chosen for it's close proximity to the Dryden paper mill. <https://goo.gl/maps/tXtjFj3NrNmjfiJh6>
